CONFIDENTIAL · SYNTHETIC DEMONSTRATION

FRAUD INVESTIGATION REPORT

Fraud GPS — Cyber Crime Investigation Platform

Powered by Fraud DNA

Case	Report scope
BH-2026-0005	Generated 25-Oct-2026 20:46 IST Depth 5; minimum ₹100; forwarding window 24 hours

Six sections: complaint, money trail, suspicious accounts, Fraud DNA, and recommendations follow this cover. Long sections continue onto additional pages.

Dataset version: d0d8a3c9bcbda6f0ec298414400312d6e9011559c357987e28d34ee945846504
Summary method: evidence-summary-v1

Investigation hypothesis from synthetic source records. This report does not establish guilt, ownership, fund recovery, or an executed restriction.

02 Complaint summary

Field	Source record
Complaint ID	BH-2026-0005
Victim	Priya Yadav
Victim account	XXXX1005 (ACC-000005)
Bank	ICICI
Reported loss	₹4,70,000
Scam type	Job Fraud
Complaint date	2026-05-12
Status	Under Investigation
Initial transaction	TX-000145

Complaint description

A fake recruiter requested a registration fee for a promised job. The victim transferred INR 470000 and received no promised service. The incident was reported for investigation.

03 Money trail summary

In complaint BH-2026-0005, dated 12-May-2026, Priya Yadav (XXXX1005, ICICI) reported ₹4,70,000 lost in a Job Fraud case. The initial recorded transfer sent ₹4,70,000 via NEFT to XXXX1012 (PNB). From 12-May-2026 22:30 IST, the FIFO trace seeded ₹4,70,000 and reached 31 accounts through 36 transfers. It detected 6 split events and 4 probable endpoints; withdrawal methods are unknown. Tracked balances at their window/cutoff total ₹4,70,000, while ₹0 stopped at trace limits or filtered transfers. Hop volume is ₹23,49,000 and counts money again at successive hops. This attribution is an investigative hypothesis, not proof of ownership or recovery.

Measure	Observed result
Seeded funds (counted once)	₹4,70,000
Accounts / transfers	31 / 36
Split events / deepest layer	6 / 5 hops
Layering detections	0
Probable endpoints	4
Withdrawal method	Unknown
Tracked retained balance	₹4,70,000
Stopped at limits / filters	₹0
Repeated hop volume	₹23,49,000 (not unique funds)

Attribution is a FIFO hypothesis through pooled funds, not proof of ownership.

Chronological transfer path

Original transfer amount and FIFO-attributed amount are shown separately. Internal account IDs disambiguate repeated masked labels.

Interpretation and limitations

- Synthetic records only. Recommendations are review suggestions; no action is sent.
- Risk scores use dataset-wide evidence; trail roles use the selected trace options.
- Probable endpoints do not prove a withdrawal. Withdrawal method is unknown.
- Locations are source account addresses, not verified cash-out locations.
- Attribution is a FIFO hypothesis through pooled funds, not proof of ownership.
- Matching scores and campaign thresholds are heuristic, not proof of a common operator.
- Entity links describe shared identifiers; they are not money transfers.
- Withdrawal method is unknown. Dormancy uses only observed prior gaps with activation bursts.
- All case comparisons use the same trace options; filters may change inferred families.
