CONFIDENTIAL · SYNTHETIC DEMONSTRATION

FRAUD INVESTIGATION REPORT

Fraud GPS — Cyber Crime Investigation Platform

Powered by Fraud DNA

Case	Report scope
BH-2026-0001	Generated 25-Oct-2026 20:48 IST Depth 5; minimum ₹100; forwarding window 24 hours

Six sections: complaint, money trail, suspicious accounts, Fraud DNA, and recommendations follow this cover. Long sections continue onto additional pages.

Dataset version: d0d8a3c9bcbda6f0ec298414400312d6e9011559c357987e28d34ee945846504
Summary method: evidence-summary-v1

Investigation hypothesis from synthetic source records. This report does not establish guilt, ownership, fund recovery, or an executed restriction.

02 Complaint summary

Field	Source record
Complaint ID	BH-2026-0001
Victim	Meena Jha
Victim account	XXXX1001 (ACC-000001)
Bank	SBI
Reported loss	₹2,21,000
Scam type	KYC Fraud
Complaint date	2026-04-30
Status	Under Investigation
Initial transaction	TX-000001

Complaint description

A caller posing as bank staff requested an urgent KYC update and payment. The victim transferred INR 221000 and received no promised service. The incident was reported for investigation.

03 Money trail summary

In complaint BH-2026-0001, dated 30-Apr-2026, Meena Jha (XXXX1001, SBI) reported ₹2,21,000 lost in a KYC Fraud case. The initial recorded transfer sent ₹2,21,000 via IMPS to XXXX1011 (SBI). From 30-Apr-2026 22:30 IST, the FIFO trace seeded ₹2,21,000 and reached 31 accounts through 36 transfers. It detected 6 split events and 4 probable endpoints; withdrawal methods are unknown. Tracked balances at their window/cutoff total ₹2,21,000, while ₹0 stopped at trace limits or filtered transfers. Hop volume is ₹11,04,000 and counts money again at successive hops. This attribution is an investigative hypothesis, not proof of ownership or recovery.

Measure	Observed result
Seeded funds (counted once)	₹2,21,000
Accounts / transfers	31 / 36
Split events / deepest layer	6 / 5 hops
Layering detections	0
Probable endpoints	4
Withdrawal method	Unknown
Tracked retained balance	₹2,21,000
Stopped at limits / filters	₹0
Repeated hop volume	₹11,04,000 (not unique funds)

Attribution is a FIFO hypothesis through pooled funds, not proof of ownership.

Chronological transfer path

Original transfer amount and FIFO-attributed amount are shown separately. Internal account IDs disambiguate repeated masked labels.

Interpretation and limitations

- Synthetic records only. Recommendations are review suggestions; no action is sent.
- Risk scores use dataset-wide evidence; trail roles use the selected trace options.
- Probable endpoints do not prove a withdrawal. Withdrawal method is unknown.
- Locations are source account addresses, not verified cash-out locations.
- Attribution is a FIFO hypothesis through pooled funds, not proof of ownership.
- Matching scores and campaign thresholds are heuristic, not proof of a common operator.
- Entity links describe shared identifiers; they are not money transfers.
- Withdrawal method is unknown. Dormancy uses only observed prior gaps with activation bursts.
- All case comparisons use the same trace options; filters may change inferred families.
