CONFIDENTIAL · SYNTHETIC DEMONSTRATION

FRAUD INVESTIGATION REPORT

Fraud GPS — Cyber Crime Investigation Platform

Powered by Fraud DNA

Case	Report scope
BH-2026-9901	Generated 25-Oct-2026 20:48 IST Depth 4; minimum ₹100; forwarding window 24 hours

Six sections: complaint, money trail, suspicious accounts, Fraud DNA, and recommendations follow this cover. Long sections continue onto additional pages.

Dataset version: 59a2310bc869b5848dbdb84f97fe5c237e4a4bfe66d6a4437739c220762691ea
Summary method: evidence-summary-v1

Investigation hypothesis from synthetic source records. This report does not establish guilt, ownership, fund recovery, or an executed restriction.

02 Complaint summary

Field	Source record
Complaint ID	BH-2026-9901
Victim	Synthetic Replacement 1
Victim account	XXXX7001 (ACC-900001)
Bank	Synthetic Demo Bank
Reported loss	₹1,00,001.35
Scam type	OTP Fraud
Complaint date	2026-01-01
Status	Under Investigation
Initial transaction	replacement-a-seed

Complaint description

Independent synthetic source records for dataset replacement.

03 Money trail summary

In complaint BH-2026-9901, dated 01-Jan-2026, Synthetic Replacement 1 (XXXX7001, Synthetic Demo Bank) reported ₹1,00,001.35 lost in a OTP Fraud case. The initial recorded transfer sent ₹1,00,001.35 via UPI to XXXX7002 (Synthetic Demo Bank). From 01-Jan-2026 10:00 IST, the FIFO trace seeded ₹1,00,001.35 and reached 3 accounts through 2 transfers. It detected 0 split events and 0 probable endpoints; withdrawal methods are unknown. Tracked balances at their window/cutoff total ₹1,00,001.35, while ₹0 stopped at trace limits or filtered transfers. Hop volume is ₹1,75,002.45 and counts money again at successive hops. This attribution is an investigative hypothesis, not proof of ownership or recovery.

Measure	Observed result
Seeded funds (counted once)	₹1,00,001.35
Accounts / transfers	3 / 2
Split events / deepest layer	0 / 2 hops
Layering detections	0
Probable endpoints	0
Withdrawal method	Unknown
Tracked retained balance	₹1,00,001.35
Stopped at limits / filters	₹0
Repeated hop volume	₹1,75,002.45 (not unique funds)

Attribution is a FIFO hypothesis through pooled funds, not proof of ownership.

Chronological transfer path

Original transfer amount and FIFO-attributed amount are shown separately. Internal account IDs disambiguate repeated masked labels.

#	Transaction / accounts	Original INR	Attributed INR	Observed time	Channel
1	replacement-a-seed XXXX7001 (ACC-900001) → XXXX7002 (ACC-900002)	₹1,00,001.35	₹1,00,001.35	01-Jan-2026 10:00 IST	UPI
2	replacement-a-forward XXXX7002 (ACC-900002) → XXXX7003 (ACC-900003)	₹75,001.10	₹75,001.10	01-Jan-2026 10:05 IST	UPI

Narrative transaction references: replacement-a-seed, replacement-a-forward

04 Suspicious accounts

Selected-trail accounts with dataset-wide risk ≥0.50, excluding the victim. Roles below use this report's trace options; scores and risk evidence use the full dataset.

No records meet the selected criteria.

Top five account assessments

05 Fraud DNA analysis

Closest other case: BH-2026-9902; signature match 94.8%. Matching strength is not a probability of guilt.

Component	Similarity	Weight
Entity	100.0%	40%
Behavioral	85.2%	35%
Network	100.0%	25%

Inferred family: Family 01 · Morning activity

2 cases; reported losses ₹1,20,001.85, counting each complaint once. Family ID: DNA-0a416f8000.

Family members: BH-2026-9901, BH-2026-9902

Behavioral signature

Feature	Observed value
Average transfer	₹87,501.23
Average forwarding	5.00 minutes
Split ratio	0.000
Observed depth	2 hops
Active hours (IST)	10:00
Channels	UPI: 100.0%, IMPS: 0.0%, NEFT: 0.0%
Observed dormancy	Not observed
Withdrawal method	Unknown
Topology	chain

Shared source identifiers

1 shared identifier records; 1 other cases. Identifiers are not money transfers.

Identifier (masked)	Current accounts	Other accounts	Other cases
phone +9***02 replacement-shared-phone	ACC-900002	ACC-900005	1

Identifier-linked cases: BH-2026-9902

Similar cases

Case	Match	Entity / behavior / network	Reported loss
BH-2026-9902	94.8%	100.0% / 85.2% / 100.0%	₹20,000.50

06 Recommended review actions

Prioritized review checklist. No accounts are frozen, records requested, or agencies contacted by this application. Local checklist marks are not execution records.

1. [Medium] Review telecom-record request: +9***02

The source phone identifier links 2 accounts. Review subscriber and call-detail record (CDR) requests through the applicable process.

Action ID: action-45412943583e5797
Evidence: ACC-900002, ACC-900005, replacement-a-forward, replacement-a-seed, replacement-shared-phone, BH-2026-9902

2. [Info] Compare linked case BH-2026-9902

Signature similarity 94.8%; 1 shared source identifiers. Compare the cited records; pattern similarity alone does not establish common control.

Action ID: action-b83d1bedbd9263df
Evidence: replacement-shared-phone, BH-2026-9902

Interpretation and limitations

- Synthetic records only. Recommendations are review suggestions; no action is sent.
- Risk scores use dataset-wide evidence; trail roles use the selected trace options.
- Probable endpoints do not prove a withdrawal. Withdrawal method is unknown.
- Locations are source account addresses, not verified cash-out locations.
- Attribution is a FIFO hypothesis through pooled funds, not proof of ownership.
- Matching scores and campaign thresholds are heuristic, not proof of a common operator.
- Entity links describe shared identifiers; they are not money transfers.
- Withdrawal method is unknown. Dormancy uses only observed prior gaps with activation bursts.
- All case comparisons use the same trace options; filters may change inferred families.
